Summary

Fourth-year Computer Science Student with strong academic performance and foundational knowledge and hands-on experience in Flask, MySQL and Web Development. Interested in AI/ML, Web Development and Problem Solving.

- Projects
- Household Service Booking System | 2026

Technologies Used: HTML, CSS, JavaScript, Flask

 - Developed a service booking platform for household tasks such as cleaning and laundry.
 - Implemented separate modules for Admin, Worker, and Customer.
 - Added features such as booking management, OTP verification, and rating system.
 - Focused on improving user convenience and service management.
- Student Management System | 2025

Technologies Used: Python, Flask, MySQL, HTML, CSS, JavaScript

 - Developed a CRUD-based web application to manage student and academic records.
 - Implemented database connectivity using MySQL and Flask backend.
 - Created modules for students, departments, instructors, courses, and enrollments.
 - Designed frontend pages for adding, updating, deleting, and viewing records.

Education

LBS College of Engineering | 2023 - 2027

Bachelor of Technology in Computer Science and Engineering

- CGPA: 9.5

- Skills
- Languages: Python, C, Java
 - Database: MySQL
 - Web Technologies: HTML, CSS, JavaScript
 - Tools: Github, Jupyter Notebook, VS Code

Certificates

Problem Solving through Programming in C | 2024

NPTEL - IIT Kharagpur

Artificial Intelligence and Machine Learning | 2025

AICTE and Edunet Foundation

Programming in Java | 2025

NPTEL - IIT Kharagpur
